

# TUNNEL NOZZLE K8

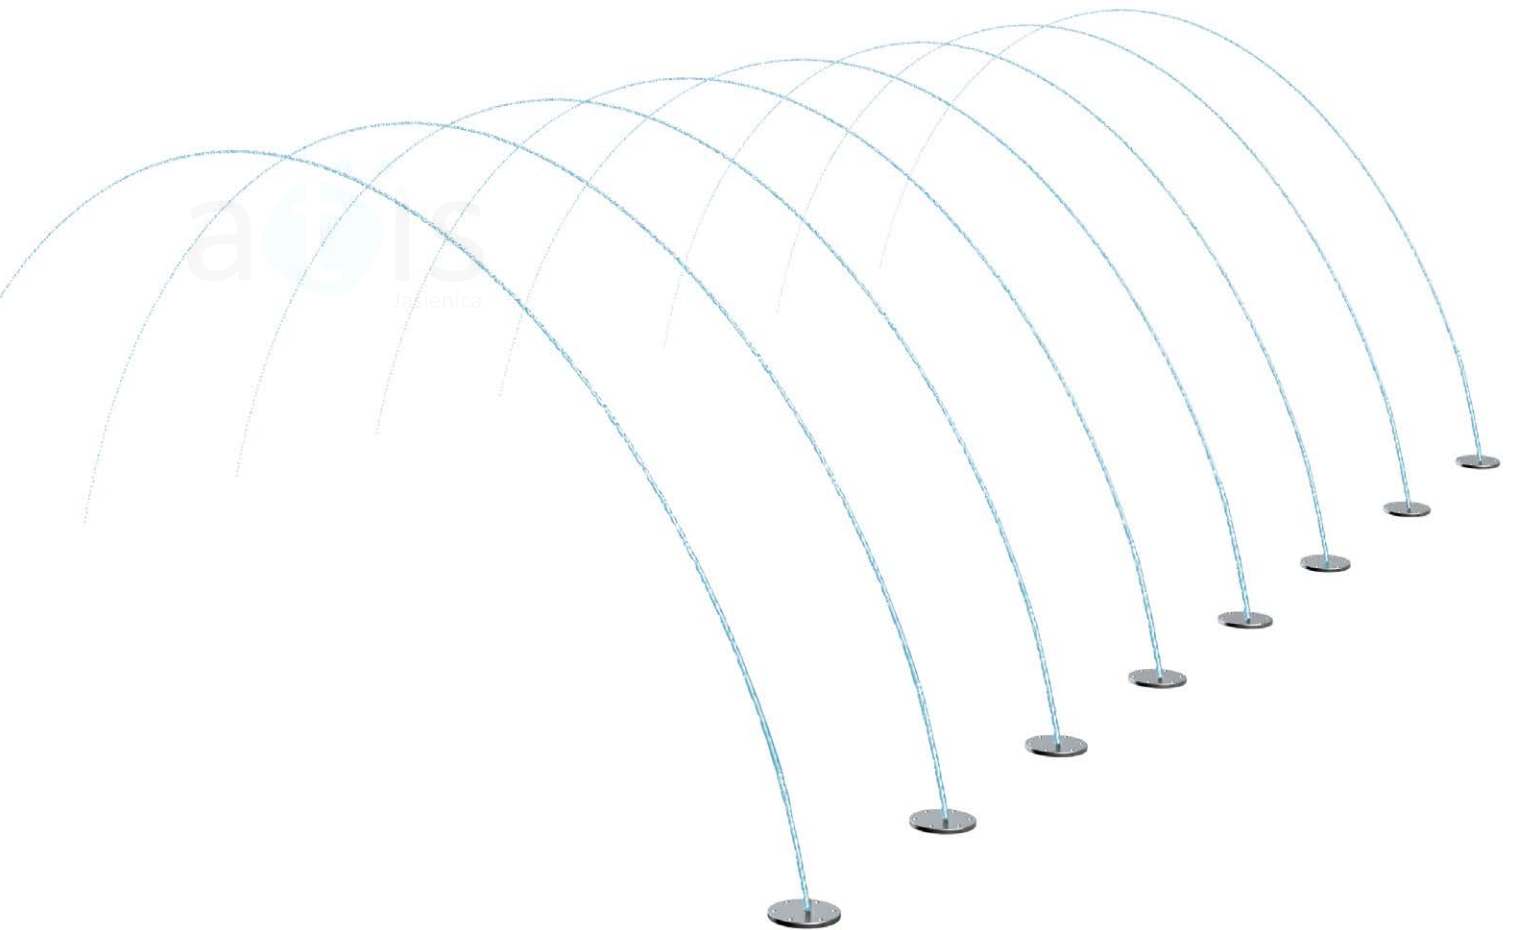

ATIS 0304

Approximate spray distance

A water tunnel or it is only an illusion?  
Try to run through it and remain dry...  
This is a real challenge for every water explorer!

Eight single-point nozzles mounted in the ground  
arranged along one line. Squirting jets form water  
arches producing a tunnel-like shape.

\* Available colours as per the separate colour chart  
\*\* Steel grade 316 L available upon request
