

Nature series

Clone 55

no. Nature 201

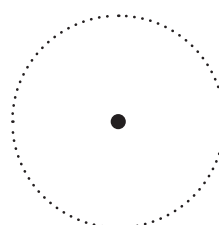

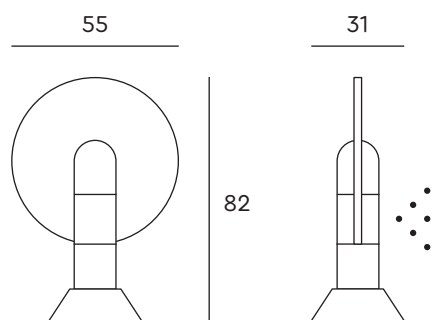

atis
Jasienica

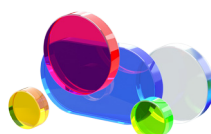

Device is equipped with a nozzle generating **thin stream of water**. Toy rotation enables to target the water in any direction.

splash area

700

type of connection	1"
capacity	4/36 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

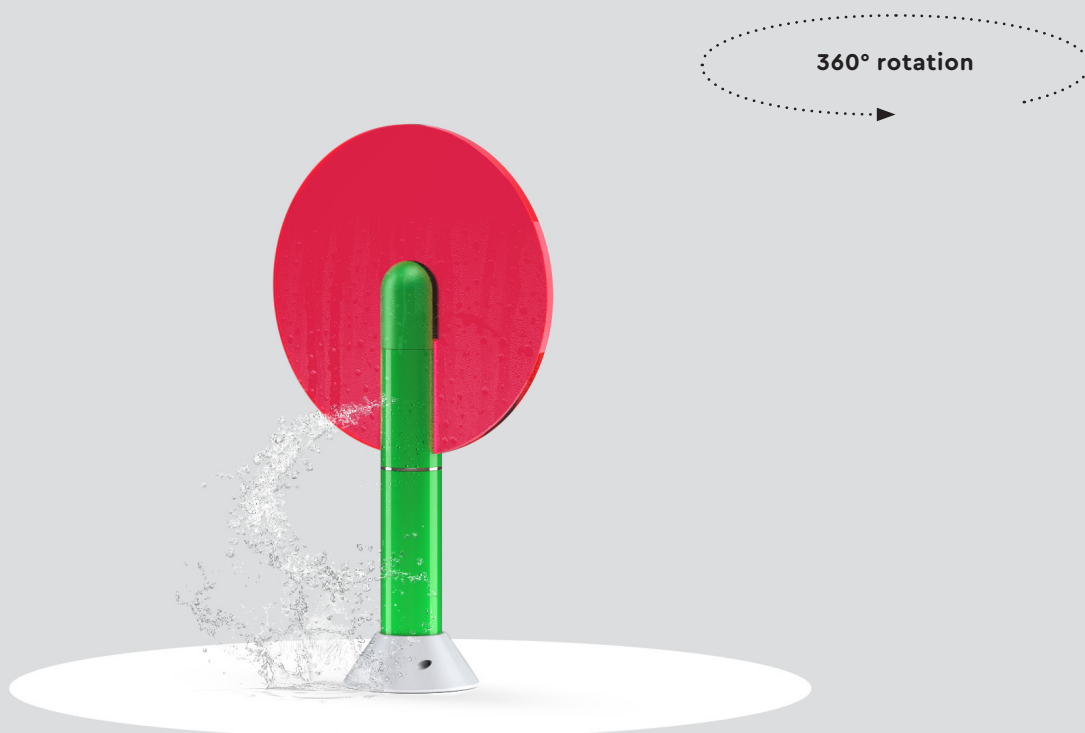

A manufacturer-recommended mounting system is required for each of the products.

Nature series

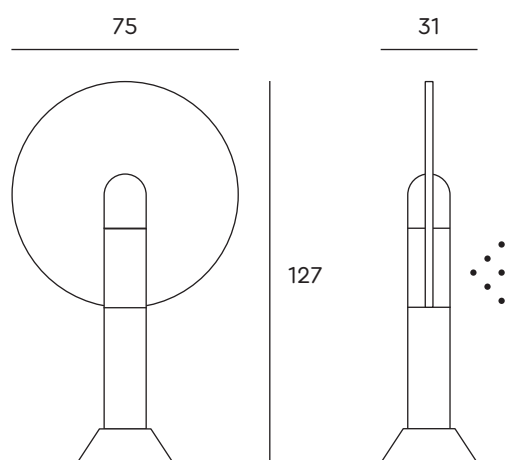

Clone 75

no. Nature 202

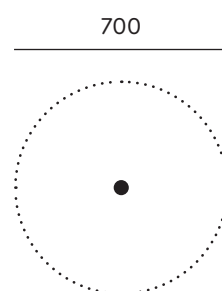

atis
Jasienica

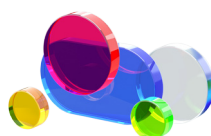

Device is equipped with a nozzle generating **thin stream of water**. Toy rotation enables to target the water in any direction.

splash area

type of connection	1"
capacity	4/36 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

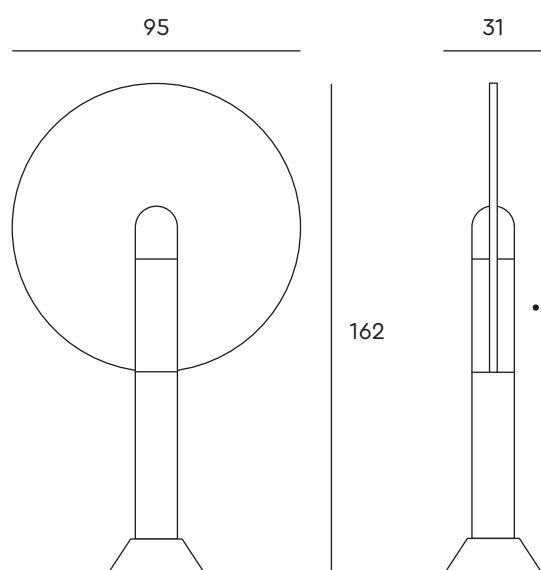

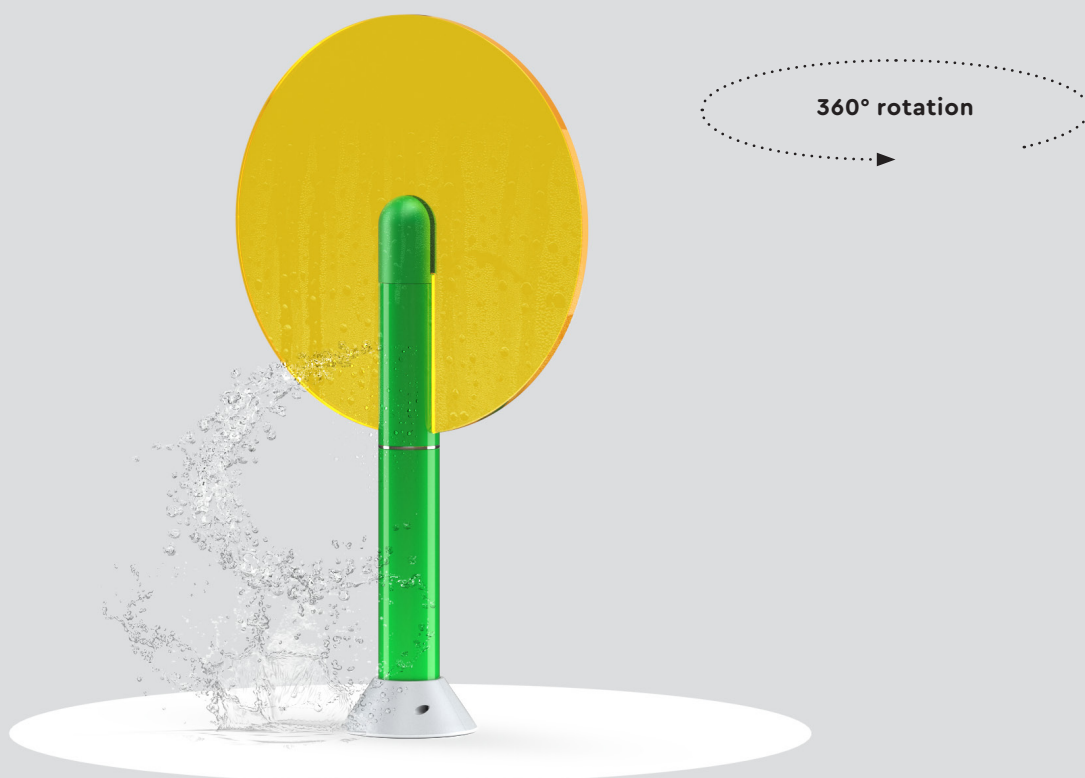

A manufacturer-recommended mounting system is required for each of the products.

Nature series

Clone 95

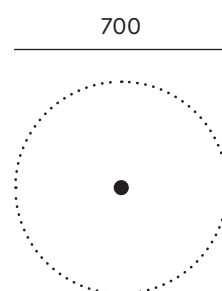

no. Nature 203

atis
Jasienica

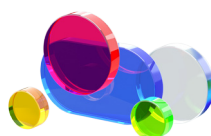

Device is equipped with a nozzle generating **thin stream of water**. Toy rotation enables to target the water in any direction.

splash area

type of connection	1"
capacity	4/36 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

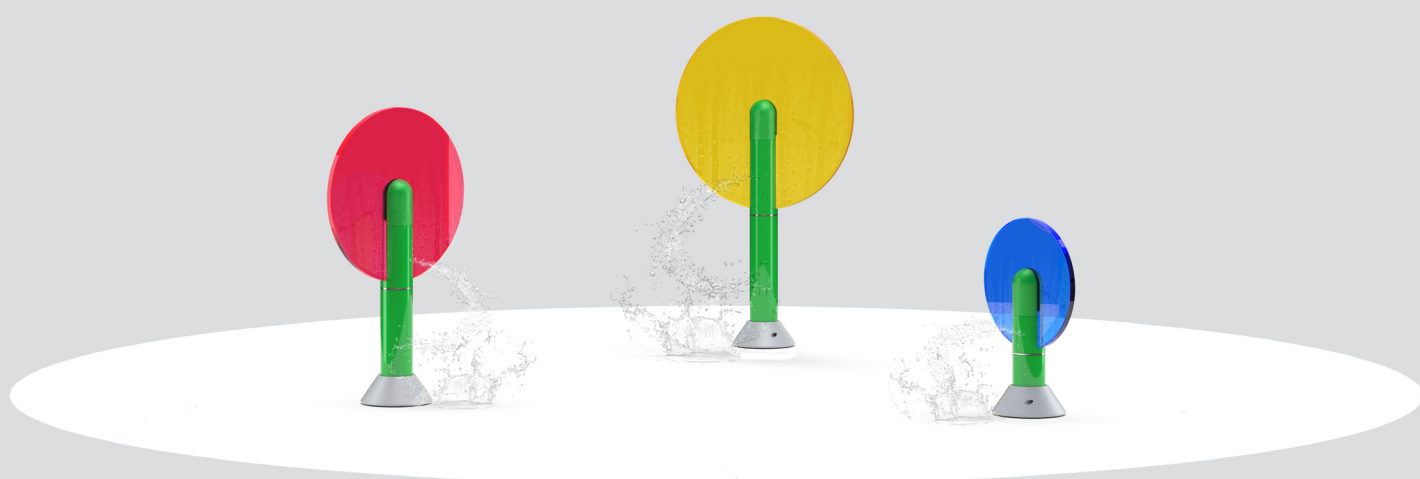

A manufacturer-recommended mounting system is required for each of the products.

Nature series

Nature series

Nasturtium

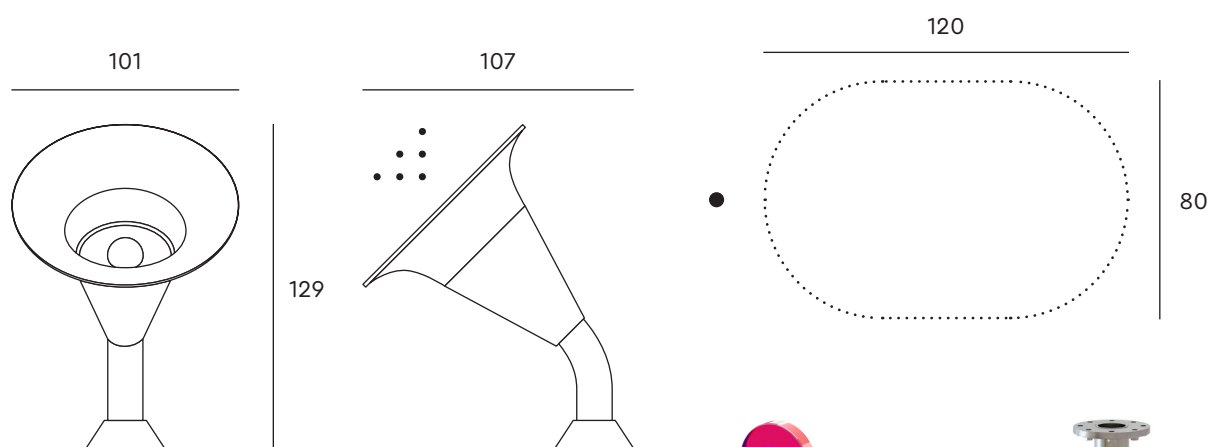

no. Nature 209

atis
Jasienica

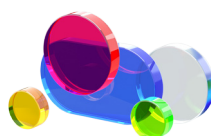

Device is equipped with a nozzle generating **water mist** – small drops, coming out from calyx.

splash area

type of connection	1"
capacity	2,5/12 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

A manufacturer-recommended mounting system is required for each of the products.

Nature series

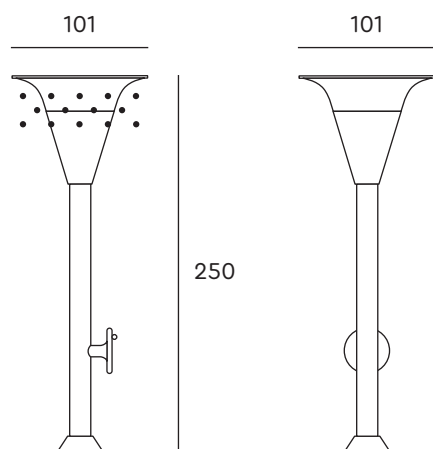

Violet

no. Nature 210

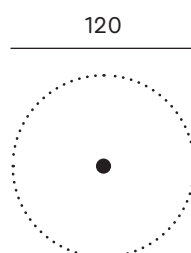

atis
Jasienica

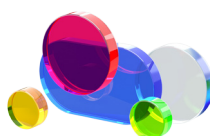

Device is equipped with a nozzle generating **waterfall** – flat, intense stream of water, coming out from calyx. Knob rotation enables to change the stream power.

splash area

type of connection	2"
capacity	45/93 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

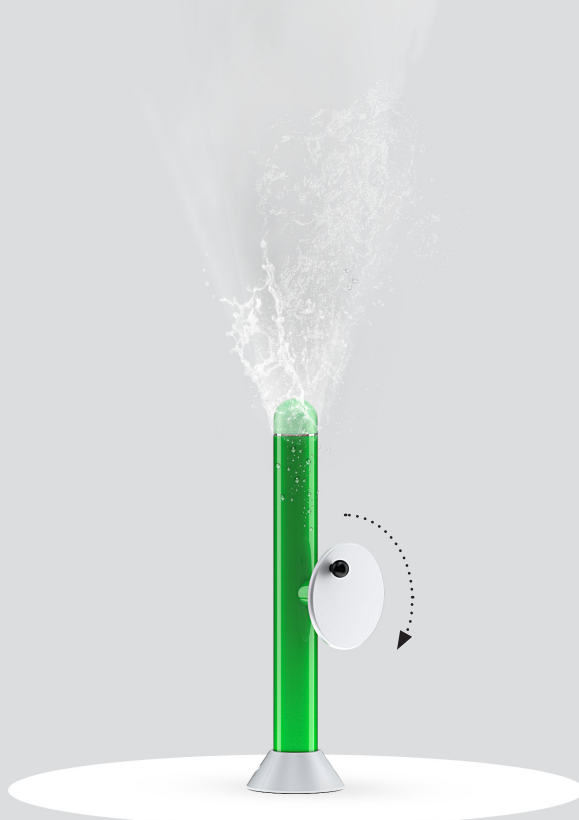

A manufacturer-recommended mounting system is required for each of the products.

Nature series

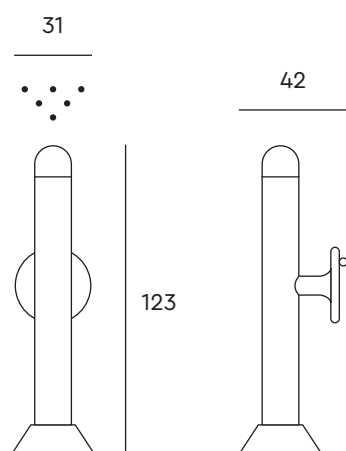

Clover

no. Nature 211

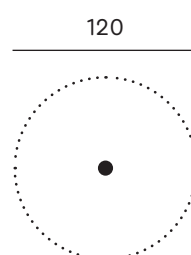

atis
Jasienica

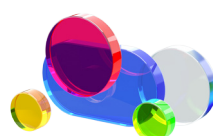

Device is equipped with a nozzle generating **water mist** (small drops). Knob rotation enables to change the stream power.

splash area

type of connection	1"
capacity	10/42 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

A manufacturer-recommended mounting system is required for each of the products.

Nature series

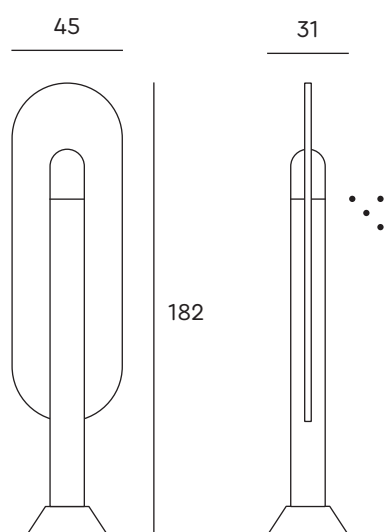

Marigold

no. Nature 212

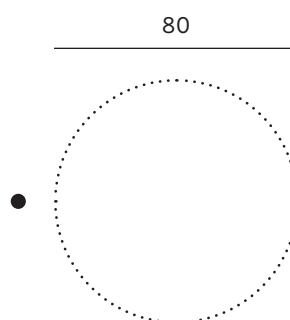

atis
Jasienica

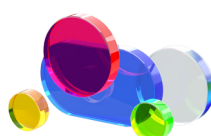

Device is equipped with a nozzle generating **arc stream of water**. Knob rotation enables to change the stream power.

splash area

type of connection	1 1/2"
capacity	11/48 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

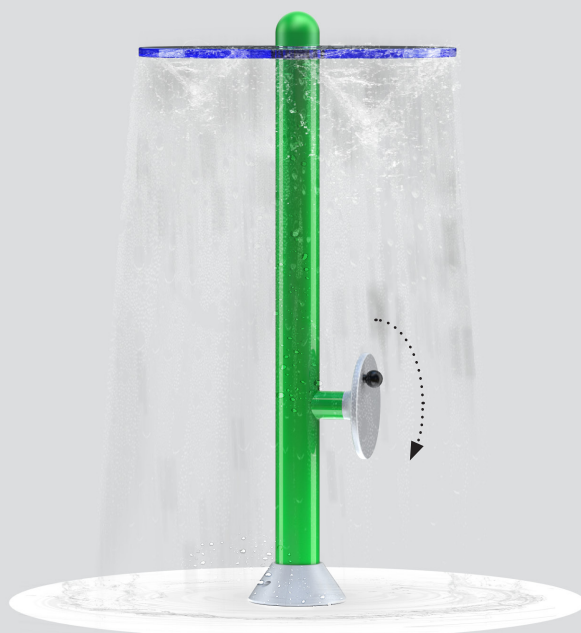

A manufacturer-recommended mounting system is required for each of the products.

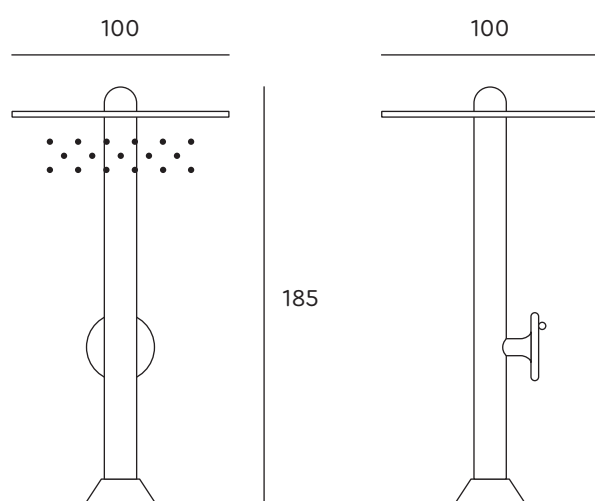

Nature series

Cornflower

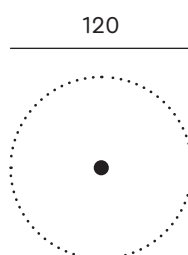

no. Nature 213

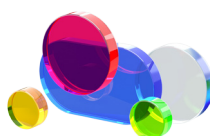

Device is equipped with a nozzle generating **waterfall** (flat, intense stream). Knob rotation enables to change the stream power.

splash area

type of connection	1 1/2"
capacity	45/74 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

A manufacturer-recommended mounting system is required for each of the products.

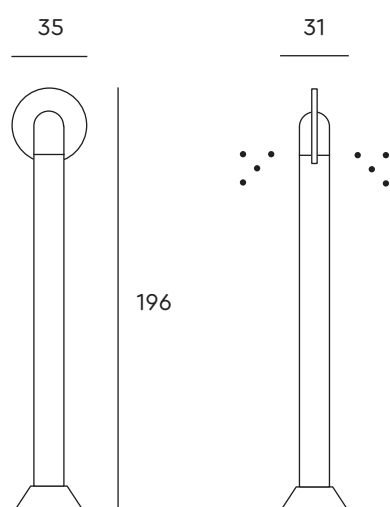

Nature series

Lavender

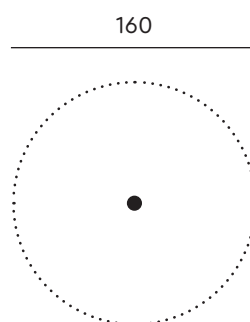

no. Nature 214

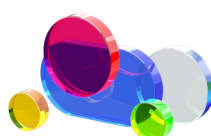

Device is equipped with a nozzle generating **arc stream of water.**

splash area

type of connection	1 1/2"
capacity	45/74 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

A manufacturer-recommended mounting system is required for each of the products.

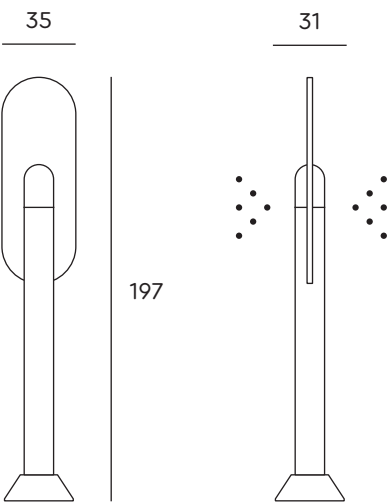

Nature series

Mallow

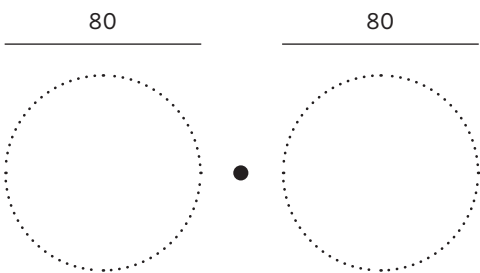

no. Nature 215

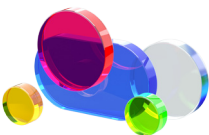

Device is equipped with a nozzle generating **dispersed stream of water.**

splash area

type of connection	1"
capacity	5/24 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

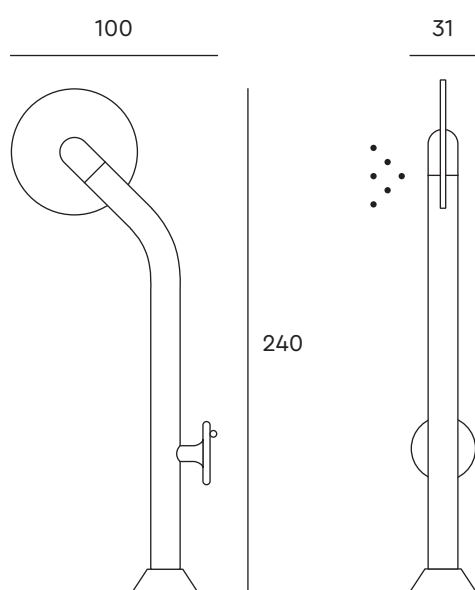

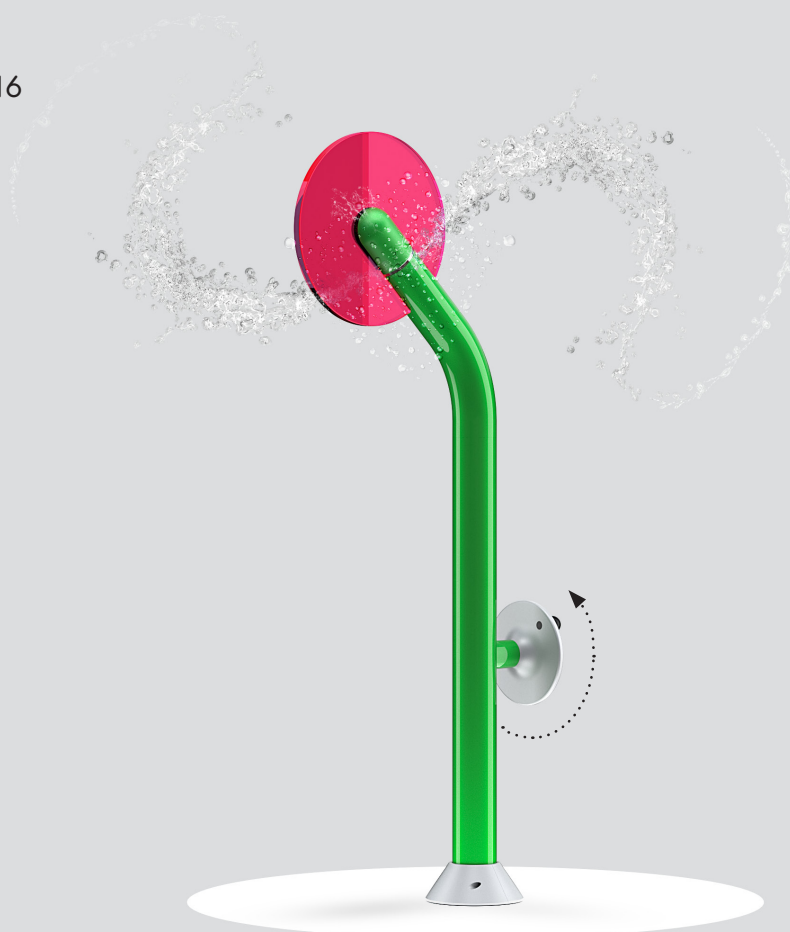

A manufacturer-recommended mounting system is required for each of the products.

Nature series

Poppy

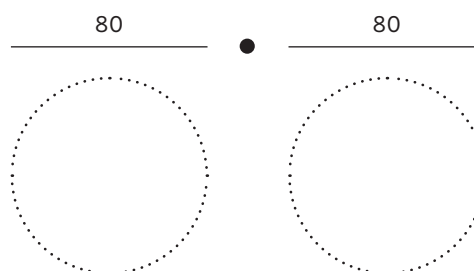

no. Nature 216

atis
Jasienica

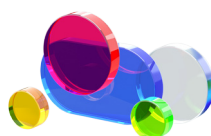

Device is equipped with a nozzle generating **dispersed stream of water**. Knob rotation enables to change the stream power.

splash area

type of connection	1"
capacity	5/24 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

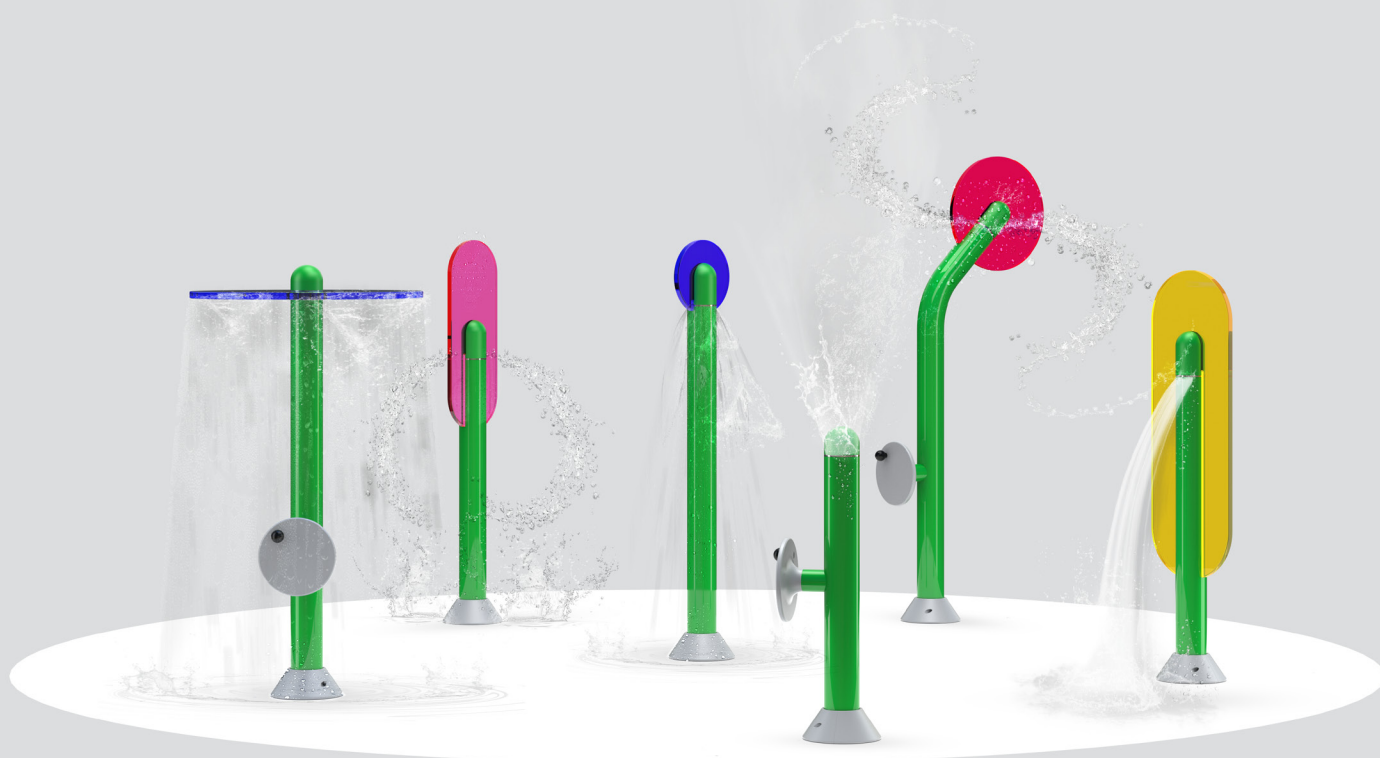

A manufacturer-recommended mounting system is required for each of the products.

Nature series

Jasienica

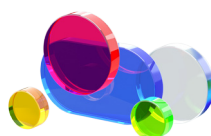

Device is equipped with a nozzle generating **water mist** – small drops, coming out from the calyx. Knob rotation enables to change the stream power.

splash area

type of connection	1"
capacity	12/26 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

A manufacturer-recommended mounting system is required for each of the products.

Nature series

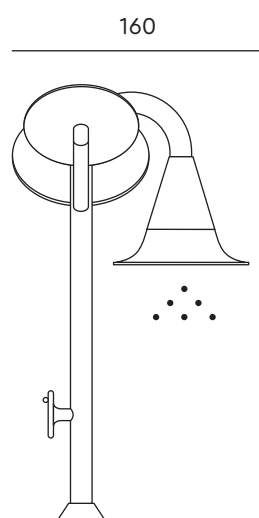

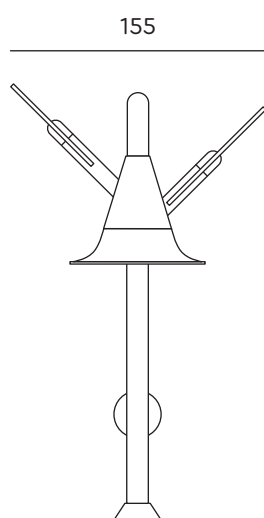

Bell flower

no. Nature 219

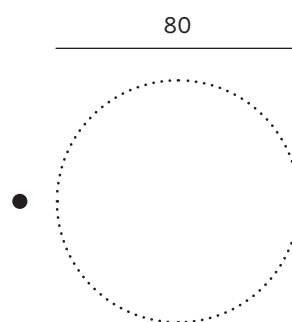

atis
Jasienica

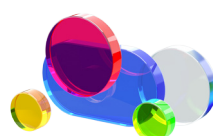

Device is equipped with a nozzle generating **rain** – drops, coming from the calyx.
Knob rotation enables to change the stream power.

splash area

type of connection	1"
capacity	12/26 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

A manufacturer-recommended mounting system is required for each of the products.

Nature series

Rowan

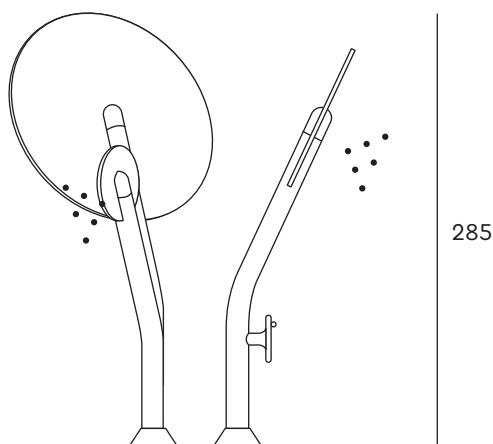

no. Nature 220

atis
Jasienica

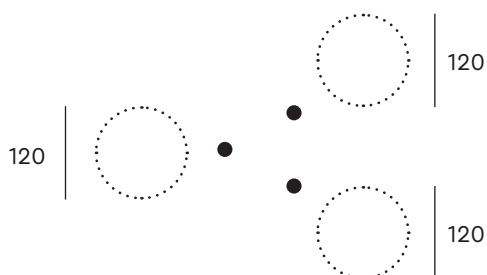

Device is equipped with nozzles generating **dispersed stream of water** and **water mist** (small drops). Knob rotation enables to change the stream power.

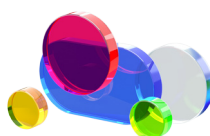

228

splash area

type of connection	3×1"
capacity	12/26 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

A manufacturer-recommended mounting system is required for each of the products.

Nature series

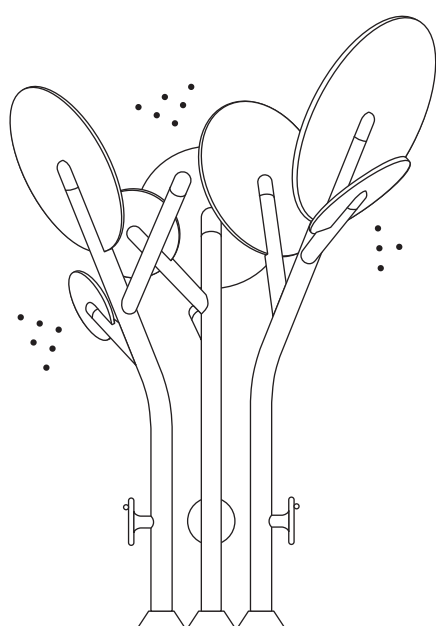

Lime

no. Nature 221

atis
Jasienica

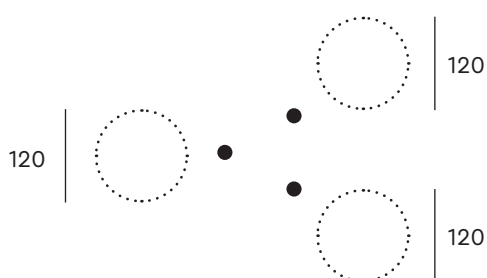

284

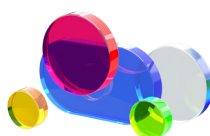

405

Device is equipped with a nozzles generating **arc stream of water** and **water mist** (small drops). Knob rotation enables to change the stream power.

splash area

type of connection	2×1 ½", 1×1"
capacity	28/94 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

A manufacturer-recommended mounting system is required for each of the products.

Nature series

Flamingo

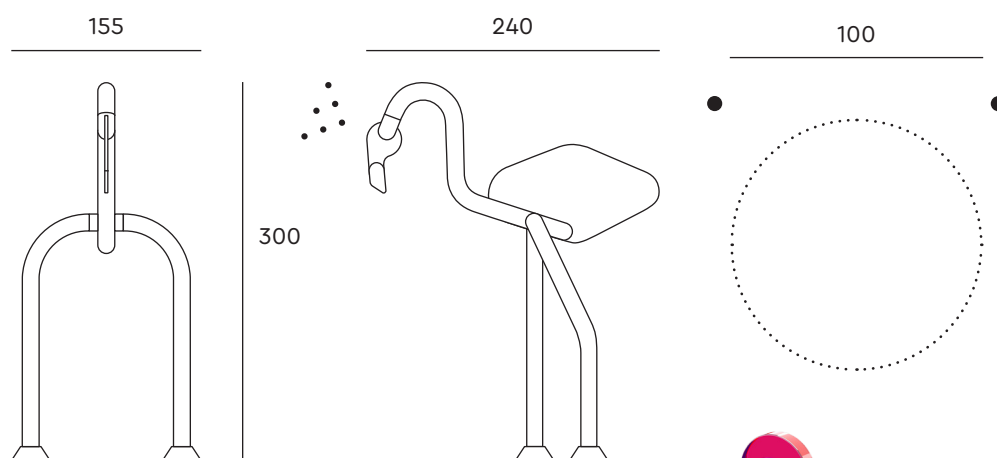

no. Nature 222

atis
Jasienica

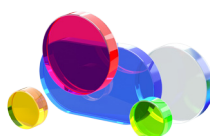

Device has a **bucket effect** mechanism.
Animal's neck fullfill with water, then slowly lapse
and the water outpour on the ground.

splash area

type of connection	1 1/2"
capacity	21/45 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on
the separate colour chart.

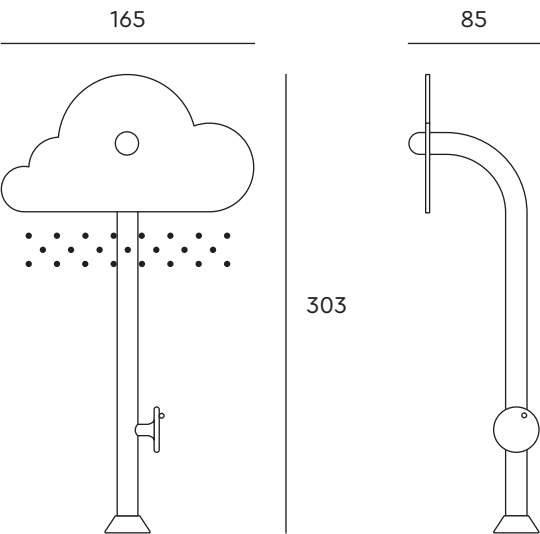

A manufacturer-recommended
mounting system is required for
each of the products.

Storm

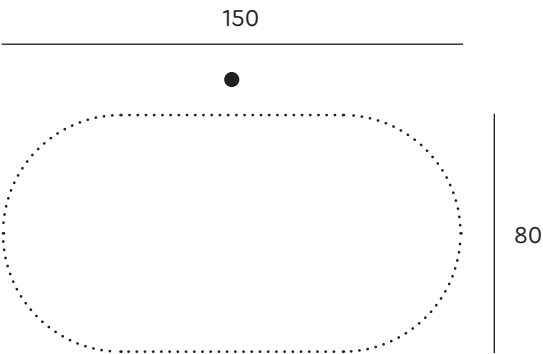

no. Nature 223

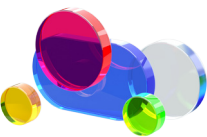

Device is equipped with a nozzle generating **rain** – drops coming from the cloud.
Knob rotation enables to change the stream power.

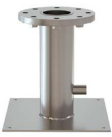

splash area

type of connection	1"
capacity	8/36 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

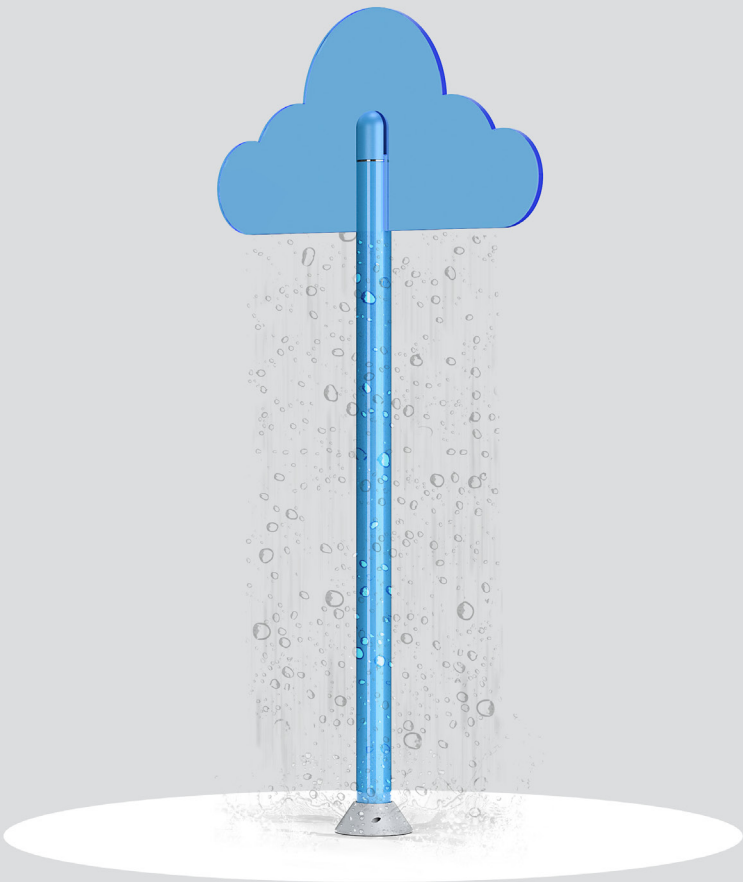

A manufacturer-recommended mounting system is required for each of the products.

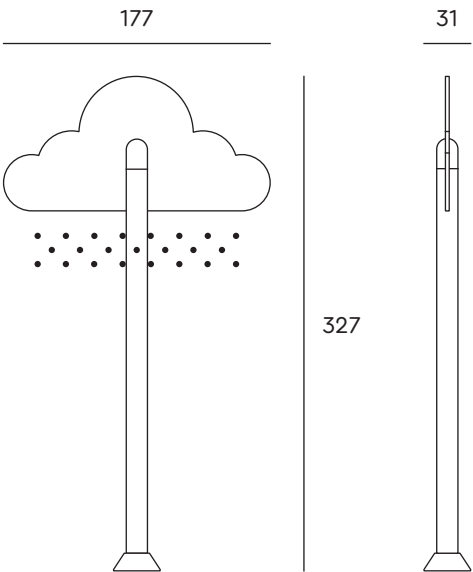

Nature series

Cloud

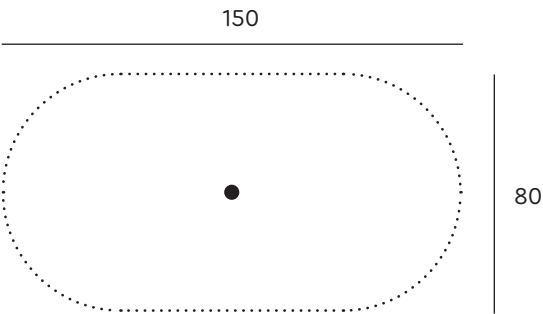

no. Nature 224

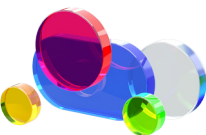

Device is equipped with a nozzle generating **rain** – drops coming from the cloud.

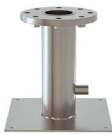

splash area

type of connection	1"
capacity	8/36 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

A manufacturer-recommended mounting system is required for each of the products.

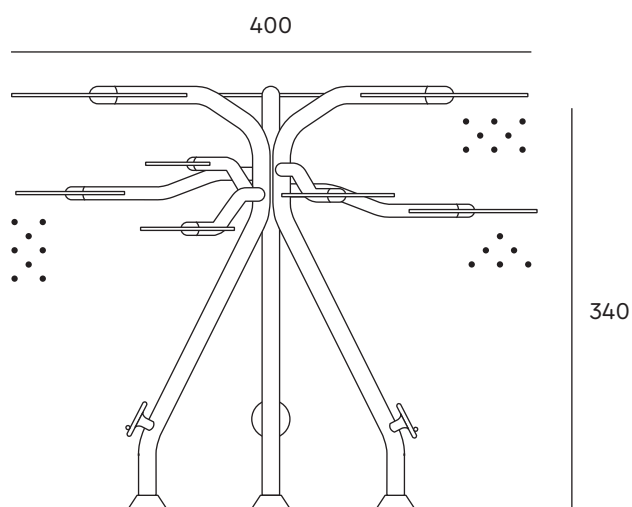

Nature series

Baobab

no. Nature 225

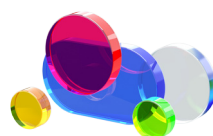

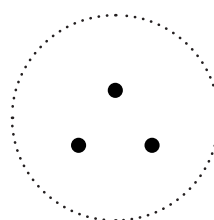

Device is equipped with a nozzles generating **water mist** (small drops), **waterfall** (flat, intense stream) and **dispersed stream**. Knob rotation enables to change the stream power.

pole pryskania

550

Available colours are on the separate colour chart.

A manufacturer-recommended mounting system is required for each of the products.

type of connection	3×2"
capacity	76/220 l/min.
materials	1.4404 stainless steel, Oroglas®

Nature series

Bamboo

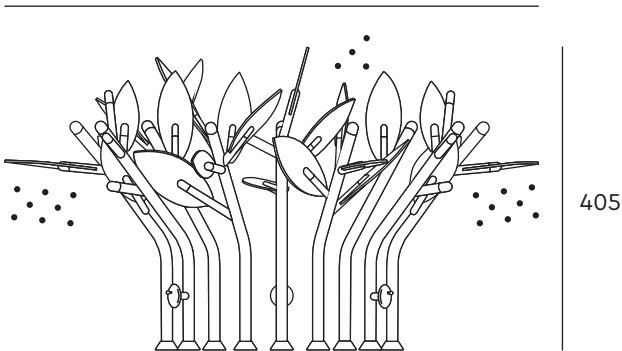

no. Nature 226

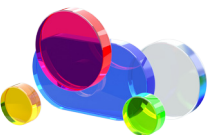

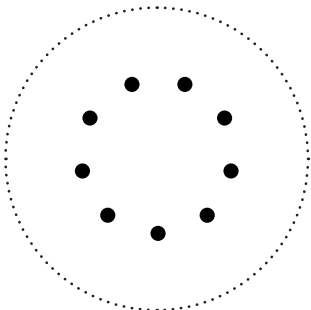

Device is equipped with a nozzles generating **water mist** (small drops) and **arc stream of water**.
Knob rotation enables to change the stream power.

splash area

720

800

Available colours are on the separate colour chart.

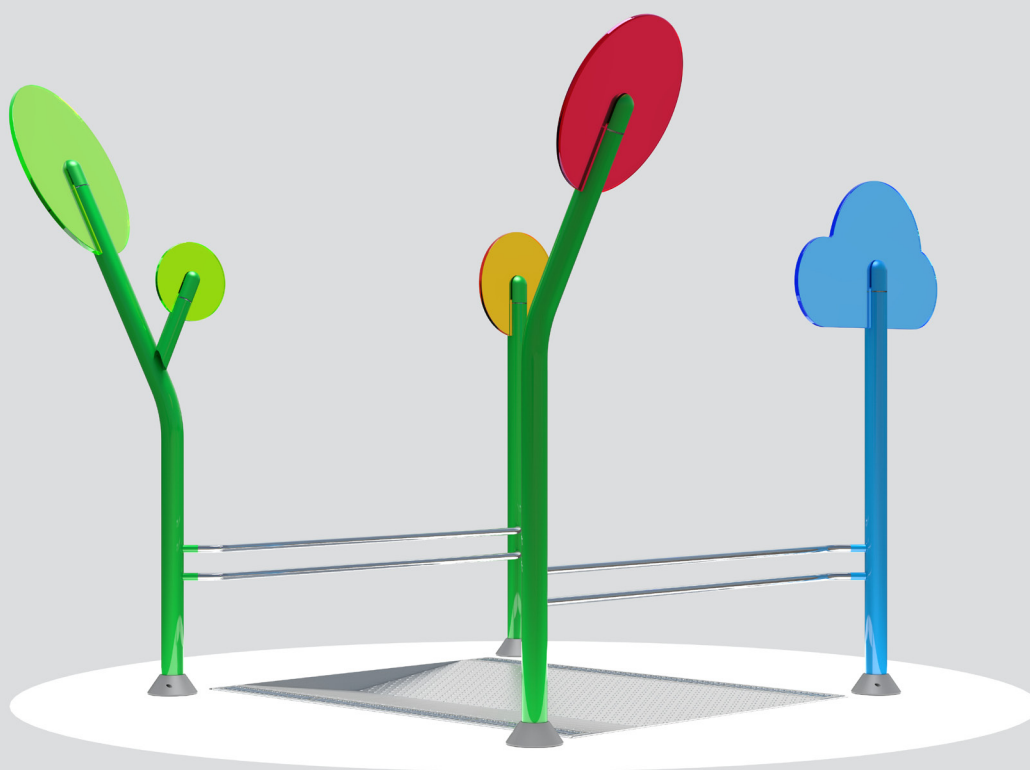

A manufacturer-recommended mounting system is required for each of the products.

type of connection	9×1 ½"
capacity	85/220 l/min.
materials	1.4404 stainless steel, Oroglas®

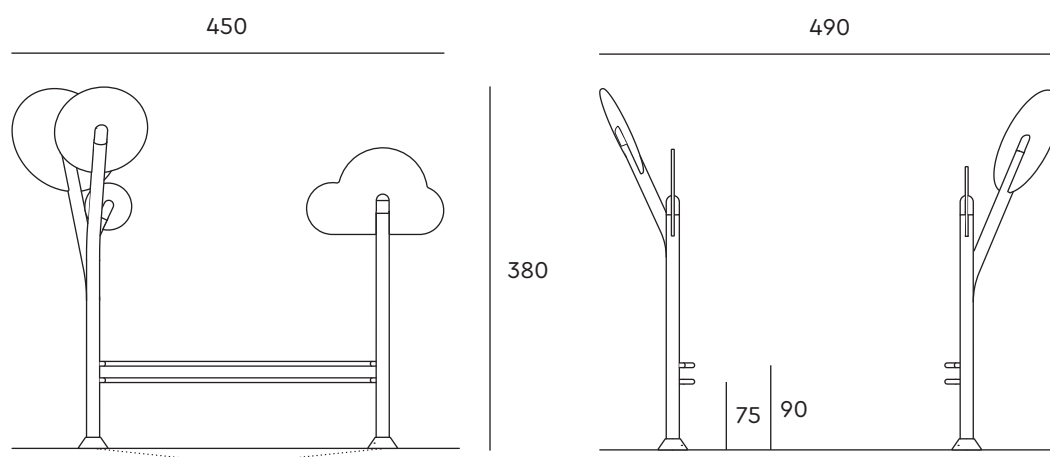

Nature series

Paddling pool BDNP1

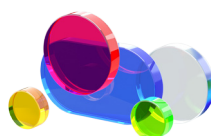

no. Nature 227

Paddling pool is equipped with **handrail**, **pool with water** and **linear drain system**.

type of connection	1 1/2"
capacity	12 l/min.
materials	1.4404 stainless steel, Orogas®

Available colours are on the separate colour chart.

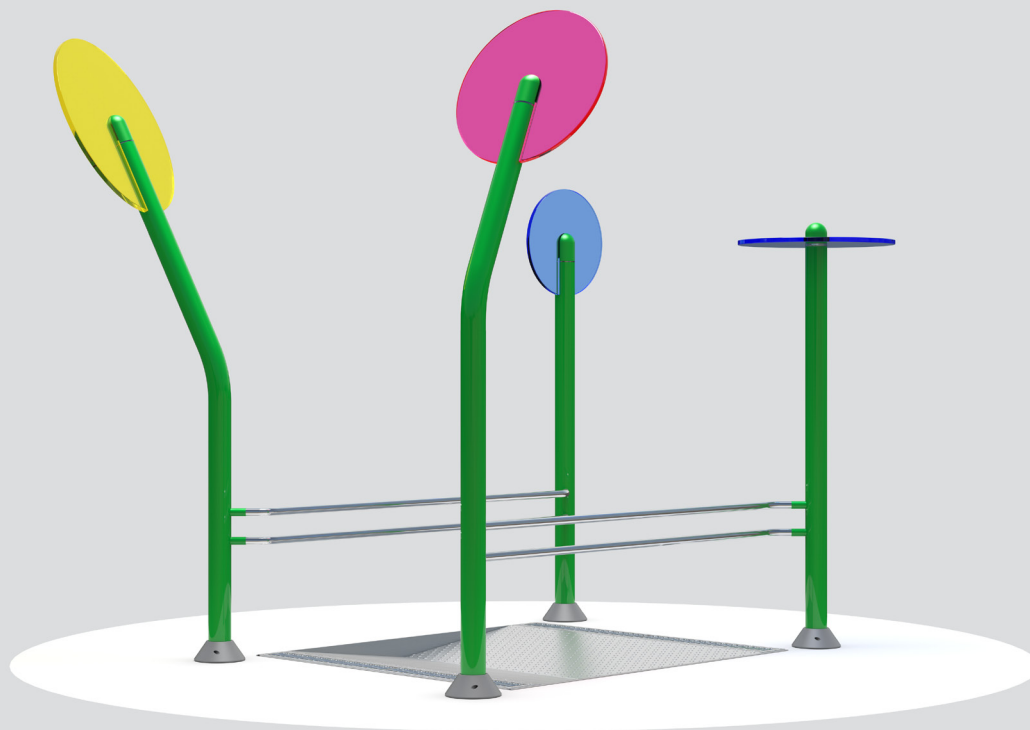

A manufacturer-recommended mounting system is required for each of the products.

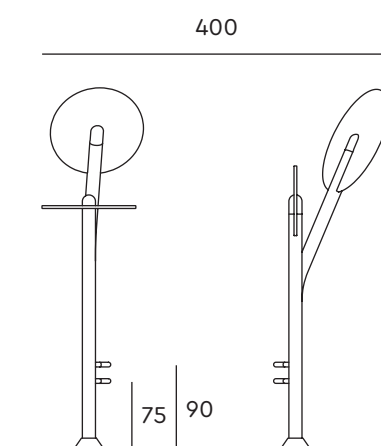

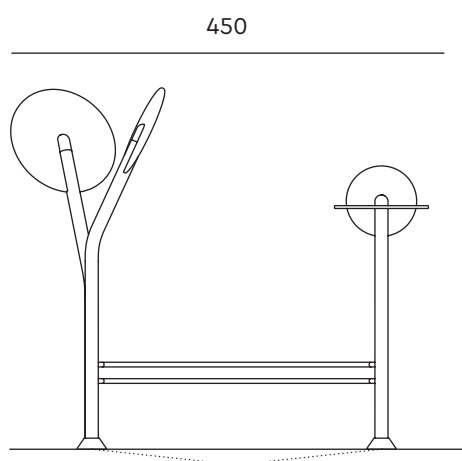

Nature series

Paddling pool BDNP2

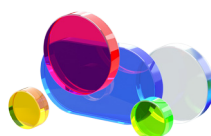

no. Nature 228

Paddling pool is equipped with **handrail**, **pool with water** and **linear drain system**.

type of connection	1 1/2"
capacity	12 l/min.
materials	1.4404 stainless steel, Oroglas®

Available colours are on the separate colour chart.

A manufacturer-recommended mounting system is required for each of the products.
